

DR VIDHI ALOK GAJJAR  
ASSISTANT PROFESSOR  
DEPARTMENT OF ANAESTHESIOLOGY  
AMC MET MEDICAL COLLEGE  
+91-9925033073  
vidhigajjar2018@gmail.com

I am Dr. Vidhi Gajjar, Anaesthesiologist working as Assistant professor in Department of Anaesthesiology since last 8 years. I did my undergraduation from Smt. N. H. L Municipal Medical College, V.S. Hospital from 2001-2006. I did my post graduation in Anaesthesiology from Sheth K. M School of Post Graduation, V. S Hospital from 2007-2010. I cleared my M. D Anaesthesia exam in April 2010 with distinction & Gold medal.

I have been working with the department of Anaesthesiology; AMC MET Medical College since January 2011. I have special interest in Regional anaesthesia especially nerve and plexus blocks as they facilitate surgical procedure with minimal haemodynamic disturbance & excellent post operative analgesia.

Learning is a continuous process in medicine. I have always valued my teaching sessions for undergraduates (especially interns) or postgraduates; as they help me refine and update my knowledge. Whether it be your specialization or refinement of skills or being updated about your field, active learning is a must. Learning is akin to a river; it has to flow to be fresh and useful. Thus ability to transfer your knowledge and skills to others is essential.

With the availability of Ultrasonography machine in our department since last 4 years, I have gradually learned and improved my skills with the recent advent of our field. With my interest in regional anaesthesia, Ultrasonography was the cherry on the cake and it opened a whole new world of knowledge for me, a road that

takes us from “Blind Technique” to “See one and give one technique”! Due to my social commitments, I could not attend any formal training for the same but this world of technology has helped me master the same to a great extent. I intend to further refine my expertise in the field and also transfer the same to my students. For that last year, we organized a one day workshop on USG guided regional anaesthesia. I am hereby attaching a summary of the workshop alongwith.

I am pursuing Advance Course in Medical Education, an e-learning course on Faculty development from the MCI Nodal Centre at SMt NHL Munucipak Medical College, Ahmedabad.

I presented a Poster on the workshop “USG guided regional anaesthesia” at the second contact session of Advance course in Medical Education. I won the best Poster award for the same.I am attaching the same.
